Bilcare bets on anti-counterfeit technology

New Delhi: Packaging solutions provider Bilcare Ltd today launched its anti-counterfeit technology for the Indian automobile industry, which has been dealing with spurious components for long.

"Counterfeit components are not only a threat to the profit of automobile manufacturers but also to the vehicle users using sub-standard safety and performance parts. Our technology, equipped with nanotechnology and bluetooth, will fight this problem of the industry," Bilcare Technologies President and CEO Raman Nanda said.
