

## A Fake Web Site That Is For Real

Appreciation is due to Bilcare Technologies Singapore for putting together the No To Fakes website, which has many useful and amusing features related to anticounterfeiting efforts in the drug and other industries.

In the useful category, this glossary of terms related to fakes and art of anticounterfeiting is thorough, there are several good book reviews, and an events link for meetings related to fighting trade in counterfeits.

On the amusing side is this page with stories about unusual fakes and efforts to profit off of illicit muppets, gas stations, and exercise machines.
